## EXPERIENCE

**Software Engineer**                                    San Francisco, CA | Oct 2016 - Present
Memebox
‣ Implemented various features on customer-facing side including, but not limited to, global reviews, review analysis, product image gallery, category filters and notifications to increase overall engagement and retention rate
‣ Designed and built the Campaign Manager on the admin panel using Angular and GoLang to allow internal teams to create and ship campaigns onto the main site
‣ Refactored Angular code into shared modules, components and services to be reusable throughout the codebase

**Jr. Web Designer**                                          San Diego, CA | June 2014 - Apr 2016
Franklin Wireless Corp.
‣ Rebranded the Mobile Hotspot Web UI using HTML & CSS to successfully launch the product to three major U.S. carriers
‣ Redesigned two different company websites by implementing a mobile responsive layout, resulting in more than 200% increase in customer engagement rate and page views

**Freelance Web Designer**                                  Irvine, CA | Jan 2010 - June 2014
Self-Employed
‣ Designed and developed website deliverables using HTML/CSS, JavaScript and jQuery
‣ Created responsive website designs for various clients including dental office, law firm and small community websites

## PROJECTS

**Yeeple** 🔗 live | ⊙ github
Board game review site (built with React and Rails)
‣ Created a single page JavaScript web application with a fully custom designed UI utilizing the Flux architecture to render game and user data
‣ Built the search/filter functionality by using AJAX server requests to fetch game data
